Results-driven IT Service Management professional with 14+ years of experience leading major incident resolution, problem management, and change management across diverse client environments. Proven record of minimizing service disruptions and maintaining optimal performance levels through structured ITSM frameworks. Passionate about leveraging Agile and SIAM methodologies to drive service excellence and cross-functional collaboration.

WORK EXPERIENCE

Viatris **01/2021 - Present**
Information Technology Consultant **Bengaluru, Karnataka, India**

- Lead major incident management processes, coordinating cross-functional teams to resolve high-priority incidents and minimize business impact.
- Implement and optimize ITIL-based service management frameworks to enhance service delivery and operational efficiency.
- Drive problem management initiatives to identify root causes and implement permanent solutions, reducing recurring incidents by proactive analysis.
- Manage change management processes, ensuring seamless implementation of IT changes while maintaining service stability.
- Collaborate with stakeholders to align IT services with business objectives and ensure continuous service improvement.
- Utilize Agile methodologies to enhance team collaboration and accelerate incident resolution timelines.
- Performing incident audits (Priority: P3, P4) for Infra and application related issues to maintain ticket hygiene & documentation.
- Maintain and update knowledge management systems to facilitate knowledge sharing and improve first-time resolution rates.

DXC Technology **11/2017 - 06/2020**
Major Incident Manager **Bengaluru, Karnataka, India**

- Orchestrated end-to-end major incident management lifecycle for critical service disruptions affecting multiple client environments.
- Established and led Major Incident Management Bridge calls, coordinating technical teams, stakeholders, and vendors to expedite resolution.
- Managed incident management protocols, ensuring adherence to SLA commitments and minimizing downtime.
- Conducted post-incident reviews and root cause analysis to identify systemic issues and drive preventive measures.
- Created comprehensive incident reports and dashboards for senior management, providing visibility into service health and trends.
- Implemented process improvements that reduced mean time to resolution (MTTR) and enhanced customer satisfaction scores.
- Used Dynatrace as the tool for application monitoring to monitor the internal applications for any issues. If any issues are observed with respect to the applications, bridge calls were opened with the respective support teams to fix the application related issues and bring back the application online.
- Mentored junior team members on incident management best practices and ITIL framework principles.

Cognizant **07/2015 - 07/2017**
Service Management Analyst **Bengaluru, Karnataka, India**

- Managed incident, problem, and change management processes in accordance with ITIL best practices.

- Coordinated with multiple support teams to ensure timely resolution and sustain an SLA for above 75% for high-priority incidents and service requests.
- Performed trend analysis on recurring incidents to identify patterns and recommend preventive actions.
- Maintain service management tools and ensure accurate documentation of all incidents and change records.
- Contributed to service improvement initiatives and process optimization projects.
- Provided regular status updates to clients and stakeholders on incident progress and resolution timelines.

IBM **06/2012 - 07/2015**
